

Theme: On The Move

Foundation Stage: Understanding the World

Enquiry Questions

- How do people travel?
- How did people travel in the past?
- How can we travel on land?
- How can we travel in the air?
- How can we travel by sea?
- How might we travel in the future?

What will I know by the end of the topic?

Different Types of Transport

- A vehicle is a type of transport to help a person travel from one place to another.
- Some examples of land vehicles are cars, bikes, trains, scooters, trucks, lorries, motorbikes and buses.
- Some examples of air transport are aeroplanes, helicopters, gliders, hot air balloons and rockets.
- Some examples of sea transport are ships, boats, yachts, submarines and jet-skis.
- Vehicles can be used to help people do their jobs.

Transport in the Past and in the Future

- In the past people used to travel in different ways. They would often use horses and carts.
- Early cars had to be wound up by hand.
- Some vehicles now are electric – which means they do not use petrol. More vehicles will be electric in the future.
- In the future vehicles may be driverless.
