Dear Parents/Carers,

Safeguarding Update: Online Safety- Fake News

With the conflict between Russia and Ukraine continuing, it seems pertinent to highlight the subject of fake news as part of our online safety information. Digital platforms have made it easier for anyone to share information online, and it can be difficult to determine whether something is real or false. What a young person sees online can shape how they view the world and impact their overall wellbeing. It's important to talk to them about how misinformation spreads and how to look out for it. Sadly, emotive and concerning topics like the war present opportunities for hoaxers and scammers to spread disinformation. Please follow the link to the NSPCC site for information about this topic.
